ENVIRONMENTAL POLICY

Complete Design Partnership recognizes the need for sustainability and to protect the environment where we may have an influence. We strive to continuously improve our environment by adopting a 'Green' approach where practical and possible which would assist in reducing and in time reversing the harmful effects of the environment.

Our aims and objectives are:

- A commitment to pursue a green agenda for each project.
- To promote the use of sustainable or renewable resources taking account of the full life cycle costing of materials.
- To select where possible renewable materials.
- To prevent contamination of land and water.
- Seek ways to use our skills and influence to improve the built environment maintaining the integrity and quality of the natural environment.
- To encourage the use of BREEAM assessment method.
- Monitor environmental performance for compliance with regulations and strive to do better than they require, wherever possible and appropriate.
- To comply and where possible exceed the requirements of Part L of the Building Regulations – Conservation of Fuel and Power.
- Regularly review our environmental strategies and inform staff of new and sound practices.
- To gain greater understanding of the environment and how we can responsibly contribute to the future.
- To adopt a recycle approach to all our undertakings.
- To reduce embodied energy of materials used in construction and maintenance.
- Reporting, monitoring and investigating environmental incidents.
